

NaturalWorks CBD Oil – FSA Update

London, UK (30 June 2022): [NaturalWorks](https://www.naturalworks.com), the natural wellness brand active in the premium-quality CBD market, is proud to announce that the Novel Food dossiers containing their 10% CBD oil passed the FSA's first scrutiny and is now visible on the [FSA's public list](#).

This means that NaturalWorks products can continue to be sold legally in the UK whilst undergoing continued assessment by the regulator.

This comes at a time when the UK CBD market is undergoing a period of rapid change as new legislation takes effect and a plethora of non-compliant products are being brought to task. NaturalWorks has ensured that they are at the forefront of these regulatory changes and their desire to be a major force in the burgeoning CBD/well-being arena.

All of this is a material step in the detailed safety assessment and review by regulators to maintain a safe compliant CBD supply to our UK based consumers.

Furthermore, NaturalWorks has introduced a QR code on all its products pack, which provides consumers the opportunity to download independent third party laboratory results for each batch. Consumers thus have access to greater information about the product they are using and ensures traceability and reassurance all around, providing another area where NaturalWorks are putting the consumer first!
